Portfolio: my-portfolio-delta-one-35.vercel.app

Professional Summary

CS graduate with hands-on experience turning operational problems into structured, measurable outcomes. Streamlined emergency mapping workflows for the Fredericton Fire Department across 50+ buildings, built risk detection systems that cut manual review overhead by 40%, and placed Top 4 out of 30 teams presenting a DCF model to RBC executives. Looking to bring that same mix of analytical rigor and execution to a team where the work contributes to safety and mission readiness that actually matters.

Education

University of New Brunswick
Bachelor of Computer Science

- Relevant Coursework:** Database Systems (Advanced SQL, Oracle), Algorithm Design, Linear Algebra, Software Engineering.
- Undergraduate Research:** AI Disinformation Detection — analyzed propagation patterns and detection methodologies for AI-generated disinformation (unpublished).
- Awards:** Thomas E. Hoben Scholarship & Ward Chipman Founder's Scholarship.

May 2026
Fredericton, NB

Professional Experience

Research Project Coordinator
City of Fredericton / Fredericton Fire Department

- Coordinated a government innovation project spanning 50+ facilities, acting as the primary liaison between firefighters, city staff, technology partners, and technical teams to ensure operational requirements were accurately captured.
- Tracked project compliance across all workstreams: maintained progress logs, flagged data discrepancies before deployment, and supported audits against municipal standards.
- Automated validation workflows using Python, SQL, and C alongside Mappedin's scripting tools to double daily output from 3 to 6 maps.

May 2025 – Sep 2025
Fredericton, NB

AI Model Evaluator
Outlier.ai

- Evaluated AI-generated outputs against logical and factual criteria across large volumes of structured and unstructured data.
- Maintained a structured issue log to track failure patterns and flag edge cases, reporting findings to drive upstream fixes — an audit and compliance function that ensured data quality standards were met.

Jun 2024 – Dec 2024
Remote

Teaching Assistant — Data Structures & Algorithm Design
University of New Brunswick

- Collaborated with professors to audit 250+ student submissions per term, catching logic errors and inefficiencies ranging from syntax mistakes to fundamentally flawed algorithmic approaches.
- Ran weekly office hours for 50+ students, breaking down complex topics like graph traversal and dynamic programming into clear explanations.

Jan 2025 – Apr 2026
Fredericton, NB

Data & Performance Analyst
UNB Reds Varsity Men's Soccer

- Worked directly with coaching staff to analyze performance data, building SQL workflows and dynamic Power BI dashboards that replaced manual tracking and shaped in-season strategy.
- Provided analytics support for a program that won the AUS championship and competed at U SPORTS nationals, contributing directly to data-driven game preparation.

Oct 2021 – Dec 2025
Fredericton, NB

Selected Projects

Enterprise Financial Modeling & Equity Research (UNB RBC Pitch Competition)
Advanced Excel, DCF Modeling, Scenario Analysis

- Collaborated with a team to build a 10-year DCF valuation and financial forecasting model for an enterprise SaaS company, integrating full three-statement financials, comparable company analysis, and dynamic sensitivity tables.
- Prepared the executive report, business case, and financial forecast presentation for RBC stakeholders — placed Top 4 out of 30 teams.

Technology Risk Detection Engine (AI Sentinel)
Python, Data Pipelines
Live Link: ai-sentinel-vert.vercel.app

- Built a data pipeline that pulls features from large datasets in real time to flag anomalies and score model risk, cutting manual review overhead by 40% through automated cross-validation.
- Built a monitoring dashboard on top so non-technical stakeholders could tune detection sensitivity and review flagged outputs themselves.
- Added an integrated educational component with structured information modules and quizzes, helping new users learn to interpret and act on the findings.

Simulation Validation Engine (Champong League)
TypeScript, Real-Time Systems
Live Link: ueafa-champong-league.vercel.app

- Built a real-time simulation framework that validated agent behavior under load across thousands of concurrent agents, stress-tested edge cases until performance and data integrity held under every condition.

Skills

Data & Analytics:	SQL (Oracle, PostgreSQL), Python (Pandas/NumPy), Power BI, Advanced Excel (Macros, Power Query), Data Pipelines, Reconciliation.
Project & Program Mgmt:	Multi-stakeholder Coordination, Workstream Tracking, Structured Reporting, Risk Escalation, Requirements Gathering, Agile/Jira, SharePoint, PowerPoint.
Financial & Business:	Financial Forecasting, Business Case Development, Executive Reporting, Scenario Analysis.
Other:	Cross-functional Communication, Eligible for Canadian Security Clearance, Committed to improving French proficiency.

Leadership

Volunteer Researcher (Data Integrity) | UNB HCI Labs

- Supported data integrity for remote collaboration and game design research projects at UNB's HCI Lab.

Investment Analyst | UNB Finance Club

Operations Coordinator | UNB Cyber Security Club

Facility Supervisor | UNB Gym

2025 – 2026

2024 – 2026

2021 – 2026

Sep 2024 – Dec 2024
